CAUTION TO REDUCE THE RISK OF ELECTRIC SHOCK, These CAUTION marks are located on the back panel and bottom of your Lifestyle center and the bottom panel of your Acoustimass Class 1 laser product CLASS 1. Opening or removing covers may expose you to dangerous voltages or other hazards. Please call Bose to be referred to an authorized service center near you. 15. <http://seftrade.cz/files/comfortsense-7000-install-manual.xml>

To prevent risk of fire or electric shock, avoid overloading wall outlets, extension cords, or integral convenience receptacles. Sounds from the left or right side of the picture are sent to left or right front speakers. Ambient sounds or special effects may be sent to the surround rear speakers. Bose VideoStage circuitry automatically directs the sound to the correct speakers. Notify Bose shipping screws from the customer service or your authorized Bose dealer immediately. Contact Bose 3. Direct one cube of each array forward. Direct the other cube toward the wall or in a Customer Service see listings different direction to create reflected sound. See the illustration of reflected sound on the inside back cover. The slots on the end components, see your dealer or call Bose provide ventilation for the 3. Place the music center within 30 feet 9.1 m of the Acoustimass module the length of builtin electronic circuitry. To purchase cables, see your dealer, electronics store, or call Bose Note The surround cables are joined together for your convenience, providing an easy to use cable for connecting the surround speakers. If needed, cables are available at many Connecting components through electronics stores, or call Bose your TV Cable TV Match red connectors to right R jacks and black or white connectors to left L jacks. Use the VCR as a tuner to select other connected sound your VCR Cable TV sources. You can use a Yadapter available at electronics stores to connect a mono source. However, the left and right speakers then play the same monaural sound. Unwind each antenna. Antennas provide better reception when their wires are not bundled. Figure 14 AM antenna The antenna connections FM antenna connections Figure 15 1. Plug the FM antenna connector into the FM ANTENNA jack on the back of the music center. VIDEO 2 Selects a video sound source connected to the VIDEO 2 inputs, and turns the system on.

AUX Selects a component connected to the AUX inputs, and turns the system on. Use the following special music center keys to tune the radio, set station presets, and scan a CD Figure 20. TUNE initiates a fast scan of the current CD. STORE or ERASE Adds or removes radio station presets. Forcing two discs into one slot could cause them to become stuck, and could damage the discs, the CD magazine, or the music center. If the system is already on, use one of these keys to select the CD player. The CD indicator on the display lights. While this jack accepts most headphone models, you can get an adapter at Bose Connecting headphones silences the speakers connected to SPEAKER ZONE 1. Bass and treble controls You do not need to adjust tone settings for changes in volume, since Bose processing technology provides a natural tonal balance over the full range of volume settings. If desired, you can further finetune your system as described below. Setting a second remote for zone 2 You need a second remote control, set to ZONE 2, to operate speakers connected to the ZONE 2 output. If your remote's commands ever conflict with those of another nearby Lifestyle its remote controls by following the procedures below. 1. Open the remote control battery cover and locate the miniature switches Figure 32. 2. Customer service For additional help in solving problems, contact Bose customer service. See the inside back cover for Bose Corporation customer service offices and phone numbers. For information on replacing the remote control batteries see "Set up the remote control" on page 14. CAUTION TO REDUCE THE RISK OF ELECTRIC SHOCK, These CAUTION marks may be located on the back panel and bottom of your Lifestyle music center and the bottom panel of your Acoustimass CAUTION To prevent electric shock, match wide blade of plug to wide slot, insert fully. Opening or removing covers may expose you to dangerous voltages or other hazards.

Please call Bose to be referred to an authorized service center near you. 15. To prevent risk of fire or electric shock, avoid overloading wall outlets, extension cords, or integral convenience receptacles. Save all packing materials for possible future use. The original packing materials provide the safest way to transport your Lifestyle any part of the product appears damaged, do not attempt to use the system. Notify Bose or your authorized Bose dealer immediately. You may obtain additional rubber feet part no. 178321, free of charge, by contacting Bose Left and right front speakers The sound from the left and right front speakers should seem to appear at the edge of the picture, so that the acoustic image is close to the size of the visual image Figure 2. Place them in the back half of your

room. Direct the cubes so that you cannot pinpoint the exact location of the sound source Figure 3. To purchase cables, see your dealer or electronics store, or call Bose Note The surround cables are joined together for your convenience, providing an easy to use cable for connecting the surround speakers. Most audio cables are color coded. Match red connectors to right R jacks and black or white connectors to left L jacks. It is best to connect components directly to the Lifestyle control panel. A second option is to use a stereo TV as the switching center to select the sound source. Connect the audio outputs of the phono preamplifier to the music center VIDEO 1, VIDEO 2, or AUX if not used for a digital source jacks, matching the red plug to R right and black or white plug to L left. Unwind each antenna's wires. Note Outdoor antennas may be used with the music center antenna connections. To install an outdoor antenna, consult a qualified installer. Replace the batteries when the remote control stops operating or its range seems reduced. Note Your speakers will not operate unless all cable and power connections are completed before turning on the music center.

Figure 16 You are ready to enjoy your new Lifestyle Opening the music center door upwards on the bottom of the door Figure 16. Use the following special music center keys to tune the radio, set station presets, and scan a CD Figure 18. STORE or ERASE Adds or removes radio station presets. You experience a surround sensation, providing extra enjoyment when you watch older i.e., prestereo movies. Load the DVD disc. Turning on the system and choosing digital sound Press AUX to turn your system on to play digital sound. If your Lifestyle receive a valid PCM or Dolby Digital bitstream, it will automatically select the analog signal connected to the music center AUX jacks. This ejects the disc far enough for you to grasp the edge and remove it from the magazine Figure 21. Figure 21 Ejecting a CD Loading the CD magazine into the music center Open the music center door. If the system is already on, use one of these keys to select the CD player. The CD indicator on the display lights. The system turns on in SURROUND mode. Select another speaker mode, if desired. Figure 27 You do not need to adjust tone settings for changes in volume, since Bose processing technology provides a natural tonal balance over the full range of volume settings. Bass and treble controls If desired, you can further finetune your system as described below. Setting a second remote for zone 2 You need a second remote control, set to ZONE 2, to operate speakers connected to the ZONE 2 output. If your remote's commands ever conflict with those of another nearby Lifestyle its remote controls by following the procedures below. 1. Open the remote control battery cover and locate the miniature switches Figure 30. 2. For information on replacing the remote control batteries see "Install the batteries in the remote control" on page 17. Handling CDs Figure 32 Handle discs by their edges to prevent fingerprints and scratches Figure 32.

Customer service For additional help in solving problems, contact Bose customer service. See the inside back cover for Bose Corporation customer service offices and phone numbers. We delete comments that violate our policy, which we encourage you to read. Discussion threads can be closed at any time at our discretion. Use only replacement parts that have critical characteristics recommended by the manufacturer. 2. Make leakage current or resistance measurements to determine that exposed parts are accept ably insulated from the supply circuit before returning the unit to the customer. Any current measured must not exceed 0.5 milliamp. Reverse the unit power cord plug in the outlet and repeat test. ANY MEASUREMENTS NOT WITHIN THE LIMITS SPECIFIED HEREIN INDICATE A POTENTIAL SHOCK HAZARD THAT MUST BE ELIMINATED BEFORE RETURNING THE UNIT TO THE CUSTOMER. B. Insulation Resistance Test Cold Check 1 Unplug the power supply and connect a jumper wire between the two prongs of the plug. 2 Turn on the power switch of the unit. 3 Measure the resistance with an ohmmeter between the jumpered AC plug and each exposed metallic cabinet part on the unit. ELECTROSTATIC DISCHARGE SENSITIVE ESDS DEVICE HANDLING This unit contains ESDS devices. We recommend the following precautions when repairing, replacing or transporting ESDS devices Perform work at an electrically grounded work station. Wear wrist straps that connect to the station or heel straps that connect to

conductive floor mats. Avoid touching the leads or contacts of ESDS devices or PC boards even if properly grounded. Handle boards by the edges only. Connection to a Bose link amplifier. Consumer Electronics, If you follow any of those links and end up acquiring a manual, it will not be from us. Here is why we may deserve your business. We love our Vintage Audio and other builttolast electronics equipment in an age of disposable products for a throwaway society.

We might sell the kids before our classic silver Pioneer or Vintage Marantz, Kenwood and Sansui gear. If you also value High Quality Manuals that enhance the ownership satisfaction of your vintage audio treasures, you found the right place. continued below. It IS Our Guiding Principle Add Site to your Favorites Other sites we host Phase Linear History Vintage Technics Database We sponsor two free Yahoo Audio Groups We are meticulous and give genuine best efforts to produce clean, wellconstructed manuals for you. A sidebyside comparison of our reproduction manuals with those from many other vendors will usually reveal an overall better appearance, construction, and print quality. Sometimes strikingly so. Our Customer Comments page is a fraction of what we receive from real customers and electronics technicians. The vast majority of our printed reproduction manuals are Very Good to Excellent on our Guaranteed Quality Ratings scale. But every single item is not and we refuse to give a false impression that they are. We want you to see a detailed description and individuallyassigned quality rating before you purchase. This timeconsuming extra service is almost never provided by our competitors. Customer complaints are nearly zero, perhaps one per 5001000 sales. We believe that virtually none of our competitors could truthfully make a similar claim. We are a USA based family business operating oldschool style. That means real people trying to serve you as if we were a walkin store in your local neighborhood. We always combine shipping on multipleitem orders and do not rip you off on shipping charges. If interested, check out About Our Manuals and other site sections with the menu links at the top of all pages. If you would like for us to be here in the future, you can help by telling your friends and by sharing links to our site in your discussion groups, forums, blogs and web sites. We have been slowly updating these manuals lists over the years.

As time allows we will replace the spare Factory ORIGINAL Manuals Catalog section with the same page format as these here in the reproduction manuals section. We also have more than 400 Gigabytes of various manuals, schematics, brochures, etc in mostly PDF format. They number perhaps 400,000 files. Truth is that we may never get them listed on our site. But they are available. Click here for further PDF manuals informatiion. If an item has a description and Price Code, then CLICK THAT PRICE PRECISELY identify the item you want with company brand. Engineered with exclusive Bose Unify technology, this system uses easytofollow onscreen messages to guide you through the setup process. It even verifies when youve made the correct connections. Enjoy up to 6 HD video and audio sourcessuch as your Bluray Disc player, cable box and gaming system. And now, its designed to let you enjoy the experience more easily than ever before. Simplicity of setup and programming through the Unify Intelligent Integration System and LCD remote. Easy to Set Up. Easy to Use. The Lifestyle V25 system features the new Unify Intelligent Integration System to walk you through system setup, step by step. As youre attaching components to the control console, the system recommends the best connectors via onscreen messages. It even confirms that the connection was made properly. Each connected device is automatically added to the source menu accessed on your TV screen. No more toggling through video inputs to find the right source. This makes it easy and intuitive for anyone to use the Unify system. Unify technology also simplifies programming your Bose remote to control your Lifestyle system and most anything attached to it. During setup, the Unify system references an internal database to identify each connected component, and automatically teaches the Bose remote to control it. And Once Youre Set Up. They produce a level of sound that adds impact and realism to your entertainment. That sound is aided by an Acoustimass module that can be placed in a corner or out of view. Exclusive technology in the module helps provide the emotional intensity you feel at the theater or in a concert hall.

Even hidden out of sight, its impact cant be missed. Sound Designed for Your Room Your room is unique, with size, shape, textures and other elements affecting the sound you hear. In addition, builtin Bose link technology can distribute the home theater systems audio to as many as four additional areas. Add compatible Bose products to enjoy music almost anywhere, even outdoors. Key Features Quality multi speaker Bose system 5speaker surround sound system designed for use with your home entertainment components. Unify intelligent integration system uses onscreen navigation to simplify system setup and everyday use. This proprietary technology walks you through setup, showing the right inputs and best connection options, and even verifies youve done it correctly. Clear, onscreen menus provide all the information you need for your connected sources. ADAPTiQ audio calibration system provides greater freedom of speaker placement. It analyzes the way your rooms dimensions and other variables affect sound, then automatically adjusts the sound of your Lifestyle surround sound system to the acoustics of your room. Up to 6 HD sources, including 4 HDMI and 2 audio HD sources. Bose remote features fewer buttons and an LED screen to simplify management of your entertainment sources. Works on radio frequency to operate through walls and floors. It charges your iPod while docked, and your Bose remote can control your iPod content. You can also play its video content on your HDTV. Acoustimass module works in concert with the small speakers to deliver a fuller range of theater sound and effects. The patented Bose design produces low frequencies for all channels with no audible distortion. Automatic video upscaling ensures movies and sports use the highest resolution capabilities of your display up to 1080p over HDMI. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average.

The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Major 4.0 out of 5 stars I personally own a surround sound that I pieced each part separately. My speakers are big, bulky and for the same price my system is better then this Bose. But thats not the point of BOSE. I bought this for my dad. Not a tech savy guy AT ALL. Loses 1 start because the price. The Bose system is much better and has excellent sound. I also bought the SL2 surround link so I wouldnt have to have wires for my rear speakers; this is a great feature and I would highly recommend it. Before buying the system, I read many reviews, read all the Bose online information and called Bose. I verified that the only difference between the V25 and the V35 is the physical size

of the speakers. So, if you're considering the Bose lifestyle, don't waste time looking at the V35 system unless you've got more money than you know what to do with. However, where you could spend that money you saved on a V35 might be for a preamp, for a turntable. I still have a very nice turntable and many vinyls, which I want to use through my Bose. You can't connect a turntable to your Bose system without a preamp; so, you have to call Bose and order one through them. Just thought I'd point this out because it was not obvious to me when I bought the system. I only realized it when I tried to hook it up. I'm an engineer, with a strong electronics background; however, it took me about 4 hours. I should add that I had to put together front speaker stands and rear speaker bookshelf stands, which did take extra time. It also takes time to undo your existing system and rerun cables, etc. Then there's running the AdaptiQ, and adding each component. And, you need time to try various positions for the reflective speakers so you can get the best sound. So, plan on a whole afternoon or evening.

As for setup, I quickly ran out of inputs on the Bose system 5 on the back. Probably because I have some older components I want to use, such as a VCR and CD changer. So, if you use a digital optical cable from your TV to your Bose, you can overcome the limitation. For instance, I hooked my VCR straight to my TV, and I hooked my DVD player straight to my TV. You only have to select the correct input on your TV for whatever component you want to use. As for the Bose remote, I don't use it. It will not work correctly with older components, and even with some newer ones. You use the setup process with the Bose, and it is supposed to figure out what your component is, and how to control it, by you pressing various buttons on your old remote in response to the Bose setup guide. It usually gets the basic ones such as volume, power and channel, but not always the others. Would be nice if you could just input your specific component and the Bose would know how to control it, but it doesn't work that way. So, I continue to use my Logitech Harmony One remote, which works great and controls all my components as well as the Bose. So, you might want to consider this if you have any older components, or you want a remote that will truly control everything. The Bose surround works great, and the rear speakers are picking up much more than my old system did. Also, I can turn it up to earsplitting and there's no distortion. Overall, an excellent system and I'm very happy with it. I highly recommend it. I wish it was offered in white black is the only option. It is expensive when compared to other systems, but we have always had good luck with Bose products. I wish that the remote worked better with the Apple TV. I still have to use the Apple remote to turn on the Apple TV. The Bose remote won't turn it on. The Bose remote does turn on all of my other components. Have listened to system in stores many times over the last few years.

Figured the store setups optimized the sound and it would never work in real life. Boy was I wrong. Can't say enough about the sound, ease of use and overall value. Setup was so simple. On screen step by step instructions for every device I added. Have connected to it, TV, Cable Box, Home Network streaming device, BluRay 3d player, CD Changer, and IPOD. The Bose remote works all of the devices when selected. So glad I finally made the purchase. It is not the first Bose we have had this problem with. Thought they would have fixed that by now. Otherwise, I just love Bose products great sound. The technology analyzes and adjusts the system's sound to the size and shape of your room. This allows greater freedom of speaker placement and ensures consistent, high quality performance. Bose's ADAPTiQ technology is partly responsible for the sound. It's engineered with Bose Unify technology, which guides you through the setup process. Bose Unify technology makes using and controlling your sources simple. The system shows you the best connection and which input to use. It even verifies the connections you make, so you can be confident you've set it up correctly. Clear, onscreen menus provide all the information you need for the sources you've connected. So you spend less time trying to figure it all out and more time enjoying it. Everything can be managed through the remote control, which has a major role in simplifying the programming process. There's no need to input any codes. Just aim the source remote at the control console and follow the onscreen instructions. With just a few button presses, it identifies almost any source and programs the remote

to control it. The remote features an LED backlit screen for ease of use, day or night. This unique combination of premium performance and breakthrough simplicity is available only from the Lifestyle V25 system. Bring more enjoyment to your home entertainment with the Bose Lifestyle V25 home entertainment system. 5.
