Today BOSS proudly announces the newest member of its Twin Pedal series. It offers adjustable Rise Time, Horn and Bass speed, Overdrive, and more. This pedal sounds amazing, and offers a stunning graphical view of the virtual rotors on its builtin display. I would like to say I like it very much. I was surprised how well it worked. I have a Leslie 720 and a Leslie 18 so I know how the real rotary sounds is. The Boss RT 20 does the job well, of course not the same as the real deal but it does a great job. Be the first to write a review. Questions Call With this in mind BOSS proudly presents the RT20 Rotary Sound Processor. This pedal sounds amazing, and offers a stunning graphical view of the virtual rotors on its builtin display. Call or click to order now! Employing COSM modeling technology, the RT20 authentically reproduces classic rotaryspeaker sounds. And not just for classic twirl, the RT20 can be used to create unique overdrive and pulsating effects as well. All Rights Reserved. Publisher does not accept liability for incorrect spelling, printing errors including prices, incorrect manufacturers specifications or changes, or grammatical inaccuracies in any product included in the Musicians Friend catalog or website. Prices subject to change without notice. Before using this unit, carefully read the sections entitled "USING THE UNIT SAFELY" and "IMPORTANT NOTES" separate sheet. These sections provide important information concerning the proper operation of the unit. Additionally, in order to feel assured that you have gained a good grasp of every feature provided by your new unit, this manual should be read in its entirety. The manual should be saved and kept on hand as a convenient reference. Main Features COSM Modeling faithfully creates the speaker characteristics, internal cabinet resonance, rotation speed adjustments, and other particular elements of the rotary speaker to provide realistic reproduction of the rotary speaker sound. Includes overdrive, a must for rock sounds. Features four internal sounds, from the conventional rotary sound to rock sounds and UNI V, a sound known and loved by many guitarists. Expression pedal can be used to freely control the rotation speed. Permits adjustment of the balance for the horn speaker and bass speaker volume levels, something difficult to accomplish with the original speakers. Use the knob to make changes in the tone, from sharp to mild, in real time.

Features Virtual Rotor Display that displays the speaker rotation effectively as a visual image. COSM analyzes the many factors that make up the original sound, such as the electrical and physical characteristics of the original, and then produces a digital model that can reproduce the same sound. No part of this publication may be reproduced in any form without the written permission of BOSS CORPORATION. Cookie Policy Contact one of our Audio Consultants for more details. Lead times may vary so please chat, call or email for up-to-date inventory status. With this in mind BOSS proudly presents the RT20 Rotary Sound Processor. Employing COSM modeling technology, the RT20 authentically reproduces classic rotaryspeaker sounds. This pedal sounds amazing, and offers a stunning graphical view of the virtual rotors on its builtin display. Roland's breakthrough

Composite Object Sound Modeling COSM uses the advantages of multiple modeling methods, and succeeds in accurately emulating existing sounds as well as producing sounds that have never before been created. With the RT20, COSM is used to simulate classic rotary characteristics, and beyond. The virtual horn and bass speaker can be independently adjusted, while the RT20's unique graphic display provides a realtime view of the rotation pattern and speed. Surround your listeners in animated sound with the RT20's dual outputs, which enable true stereo effects. The RT20's phone jack is handy for private practice and experimentation. The spinning lights don't just look cool, they also show the audiorotation characteristics of the RT20 in real time. The center of the display, illuminated in red light, represents the virtual horn. The outside ring, illuminated in blue, displays the rotation of the virtual bass speaker. It's attractive and informative! Be the first! That's where you come in.
