The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage". Do not place or store unit where it can fall or be pulled into a tub or sink. Do not place in or drop into water or other liquid. Avoid placing on top of stereo equipment that radiates heat. Never block the air openings of the unit with materials such as clothing, plastic bags or papers, or place it on a soft surface such as a bed or couch, where the air openings may be blocked. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Control Compartment Cover 5. Daylight Savings Time Switch 2. Backup Battery Compartment Cover 6. The first time you connect your new clock to the AC outlet, the internal computer will automatically set the correct time and date for the Eastern Time Zone, which is the initial default setting. Press the SNOOZE button for 3 seconds and continue to hold to toggle through each of the backlight settings. The backlight setting will change every 3 seconds while the SNOOZE button is being pressed and held. The clock will go into Alarm Set mode. Alarm 1 time will flash. When the alarm sounds, press the ALARM 1 or ALARM 2 button into its "down" position to shut off the alarm. If the alarm is set to buzzer, the buzzer will sound for 20 minutes if the alarm is not turned off or the SNOOZE button isn't pressed. The Sleep timer can be set for 60, 30 or 15 minutes. To choose a Sleep time or to turn the Sleep function OFF, press the SLEEP button with the Radio or AUX on to scroll through your choices of 60, 30, 15 and OFF. After 7 seconds, the display will return to the current time. P1 Preset 1 with a frame around it will appear on the screen. The time graphics will flash on the display. Activating the RESET function will revert the date and time to January 1, 2008, 1200 a.

Overall, you should be able to operate and maintain your Brookstone digital desktop clock with no problem. You have to keep the clock in a normal temperature room so that the clock's lifespan is preserved. If you need to clean the clock or if it's semidirty, don't submerge the clock in water. Only clean it with a soft damp cloth. Use a soap and water solution, but do not soak the clock with water. If you need to troubleshoot the clock, the issue will, for the most part, appear on the clock. If that doesn't work, you need to reset the clock. The reset button is on the control panel of the clock. If that doesn't work, you most likely need to replace the batteries. Unfortunately, the clock doesn't take just any battery that you have lying around your house. A DC 8V adapter and a backup CR2430 battery are included when you purchase the clock. If you need another battery, a replacement battery can be purchased at a jewelry store.

When you want to replace the battery, first you need to use a screwdriver to remove the compartment door. Then, you'll remove the old batteries and replace them with new ones. If that's your time zone, you're all set. If you need to change the time zone, you have to remove the cover of the control, which is located on the bottom of the clock, to change the time zone. Then, you'll set the switch to the appropriate time zone. It will automatically change the clock on the first Sunday in March and November. The clock also has a 24-hour format or a 12-hour format. Most Americans use the 12-hour schedule, but if you prefer the 24-hour format, you can change the switch. If you need to set the alarm, the alarm setting is on the back. It has an alarm feature as well as a built-in thermometer. It's namesake feature is a sensor-activated LCD screen. Loading Unsubscribe from Ricky simple commentary. CKBabyBoutique 1,154 views.
